

# Col de l'Ouillat - Pic Néoulous

Albères - LAROQUE DES ALBERES

(Elisabeth Coste)

*A hike that allows you to reach the summit of the Albères and enjoy a breathtaking view of the two Catalonias while conserving your energy.*

Discover the Albères State Forest and its stunning panoramas. On one side, you'll see the sea and the Roussillon plain; on the other, Catalonia and the Canigou.

## Useful information

---

Practice : Hiking

---

## Puig Neulos (A)

Culminating at 1256 meters above sea level and marking the border between France and Spain, Puig Neulos is the highest point of the Massif des Albères. On this promontory, one is very quickly seized by the contrast of the stone tower, and the television relay station. The view is breathtaking. We can clearly see the Roussillon plain bordered by the sea, the Pyrenees mountain range to the west, and the Ampurda plain where the rocky coast comes to die gently in the Bay of Rosas.
