Arrival : Chemin de l'écluse/lookout point Montesquieu

1. At the entrance of Mas Péricot, either make a round trip to the belvedere, or ignore the track that leads to the Belvedere and take the dirt track, to the left, which goes up towards the Font dels Treze vents. At this point, there is a picnic table and a fountain.
2. At the junction, there are two options: either continue towards the Font Del Sabater and follow the DFCI track, or climb up the steep and narrow path, located to the left of the transformer. This path offers an exceptional panorama.
3. At the top of this steep slope, continue straight on the DFCI track towards the Soldier's "casot". (On the north side of the Soldier's "casot", a trail leads to small rock formations with original shapes, like "the Oyster". Beautiful panorama of the Roussillon plain). For the return, return to this point and descend by taking the DFCI track back to the starting point."
